PROFILE

An innovative, highly motivated individual with experience in content creation, script writing, DI colour, visual effects, various editing and designing software. Knowledgeable in the framework of a timeline-based workflow and flexible enough to have the ability to adapt and change. Have ample know-how of **Pre-production** and **Post-production** of a project and can deliver constant updates. Also versatile in researching, with good verbal and written communication skills. I also have a vast portfolio that has helped me build expertise in team-collaboration and remote managing. In depth knowledge of **SEO, SEM,** Performance marketing, proven campaigns make me a trendsetter and key-word specialist in optimizing traffic flow.

EMPLOYMENT HISTORY

Creative Director | Metanoia Kleos Empowerment Foundation, Bengaluru
July 2024 – October 2026

- Oversee the entire creative pipeline from initial pre-production and concept development through to final post-production delivery.
- Manage, mentor, and align team members within the production pipeline to ensure seamless collaboration and project efficiency. Manage a team of counsellors and delegate work to them for boosting content.
- Direct visual storytelling strategies to elevate the foundation's creative assets and brand impact.
  Photography, videography, assemble and structure narratives, motion graphics for their events, social media digital marketing,

Freelancer, Guwahati
March 2023 — June 2024

- Produced video content for multiple clients that increased brand reach and engagement on social media platforms
- Conducted market research and provided insights into consumer trends, resulting in improved product offerings
- Designed logos for clients

DI Colourist / Video Editor at Nexster Studios, Guwahati
August 2021 — December 2022

- Selecting, trimming, and arranging clips to create a cohesive narrative structure for numerous series and cinemas.
- Adding visual and sound effects to enhance the storytelling and create a polished final product.
- Collaborating with directors, cinematographers, and editors to achieve the desired visual style through colour.
- Using colour-grading software to manipulate colour, and match shots to maintain a consistent look throughout the project
- Creating visually appealing and engaging title sequences for films, television, and other video content

Video Editor/Videographer at JSW Cement, Kolkata (Contractual)
September 2018 — August 2019

- Developed and managed projects from conception to completion, including storyboards, post-production, and final delivery formats.
- Assembling stock material, editing sound and sequences to provide a final product within time and budget constraints
- Worked with the editorial team to produce content for broadcasting including promos, digital, and marketing content.

Content Writer at Touracle Solutions, Kolkata (Part time)
May 2019 — May 2020

- Writing content while keeping SEO recommended points in mind which are valuable for online engagement.
- Wrote and edited high-quality articles, blog posts, and website copy that drove organic traffic to the company website by 13%
- Conducted keyword and audience research to ensure content was tailored to target audiences

- **KEY PROJECTS**

Lead Editor & DI Colorist | *Protisudh* (Web Series)

- **End-to-End Post-Production:** Sat down with the director and spearheaded the complete post-production pipeline from raw footage assembly to final master delivery across all episodes.
- **Narrative Editing & Assembly:** Structured, cut, and assembled sequences to craft a gripping narrative arc, ensuring continuous emotional rhythm and story momentum according to the director's needs
- **DI Color Grading & Look Development:** Designed the series' signature color palette in DaVinci Resolve, executing detailed shot matching, scene tone separation, and filmic contrast to elevate cinematic production value.
- **Motion Graphics & Title Design:** Created dynamic on-screen graphics, lower thirds, and episodic title sequences aligned with the series' dramatic tone.
- **Platform Acquisition & Delivery:** Mastered the final episodes to strict broadcast and OTT technical delivery with formats such as DPI 60. specifications, resulting in successful selection and distribution on a regional streaming platform

Cinematographer | Sorora (Event)

- Handled the complete video pipeline from pre-production planning and on-location cinematography to editing and color grading in post-production.
- Managed event operations on the ground, coordinating schedules, vendor requirements, and setup to ensure the event ran smoothly.
- Uploaded finished video assets and ran targeted Meta and Google ad campaigns, combining paid outreach with SEO best practices to bring in prospective customers and boost brand visibility.

Product Videographer and Search Marketing Support | Drip (Event)

- Managed the physical camera setup, lighting, filming, and post-production editing to create clean product videos tailored for social feeds and product listings.
- Collaborated on digital marketing efforts by setting up basic search ad campaigns (SEM) and optimizing product descriptions with relevant search keywords (SEO) to channel interested shoppers to the store.
- Tracked basic view counts and engagement metrics across video assets to identify high-performing creative and improve buyer click-through rates.

Cinematographer and Production Support | Amal Kleos Chronicles (Event)

- Executed the video shoot on set, managing camera setups, shot framing, and lighting across production schedules.
- Organized project timelines, footage archives, and post-production handoffs to keep the overall workflow moving efficiently.
- Coordinated with team members to resolve production bottlenecks and ensure delivered footage met visual standards for release.

Mobile Application Developer and Testing | Categories Challenge (App)

- Completed full design and development of an independent mobile application from scratch, handling interface layouts and build configurations. This is my own app.
- Coordinated a closed testing group with multiple users to gather feedback, identify bugs, and analyze interaction data prior to public release.
- Prepared the build and store assets for the platform review process, while laying the groundwork for initial digital marketing and keyword optimization strategies for launch.

.
